Interdisciplinary Winter School on Personalized Medicine

The winter school for doctoral students of law, life sciences, business and medicine covers:

An introduction to life sciences for law, ethics and business students.

An introduction to ethics and law for life scientists.

Lectures by experts.

A case study-based training on problems related to personalized medicine.

Prepare yourself for an interdisciplinary experience and build-up your network.

Part 1: January 20-22, 2014 at the University of Zurich.

Part 2: January 27-29, 2014 at the Seminarhotel Lihn.

The program is organized by the Ph.D. program in Molecular Life Sciences and the Ph.D. program in Biomedical Ethics and Law. Additional funding is provided by the UZH Graduate Campus.
